

Exigo Plate Loaded Smith Machine (5 Degree)

£2,900.00

Product Images

Short Description

Designed and manufactured in the UK, this Exigo Smith Machine offers exceptional quality and durability as a commercial piece. Suitable for use in any home or commercial facility this plate loaded Smith machine has a 5 degree angle that allows users to perform biomechanically correct movement during your exercise.

Exigo make all their machines to order and therefore is not available as an 'off the shelf' product. This allows you to choose your frame colour, but also know that each piece is manufactured carefully and to spec. This does mean lead times vary, please contact us for more information.

* Please note no Olympic plates included

Why Exigo?

Exigo is a UK owned business that manufactures in the UK. Using high quality commercial-grade steel and bearings, this ensures the Exigo Smith Machine has a ultra smooth Smith system thanks to the 30mm linear bearings.

Adding the safety catchers to the bar, accessible with a small rotation of the wrist, gives you reassurance when performing heavy squats, presses and other exercises. The bar is tested to a load rating of 1000lbs and being plate loaded, means each user can add as much weight as they require. Sturdy and stylish, with your choice of frame colour from their swatch of colours, Exigo have designed their Smith Machine to give you years of maintenance free use.

The Perfect Smith Machine?

This superb commercial grade plate loaded smith machine from Exigo will prove to be a great investment. Tough and durable it will cope with the demands of gym or health club use and will be suitable for the heaviest of lifters. Simply load the bar with weight plates and perform squats in safely and correctly. The 5° angle of the machine is designed to replicate a natural squatting movement and further enhances the all round effectiveness of this product.

When buying a piece of equipment from Exigo you will get the reassurance of a lifetime warranty on the frame and 2 years on moving parts. Not only this, the machine can also be customised to suit your needs. We have a range of frame colour options and can even adjust the height of the machine if space is an issue. For any custom requirements simply contact us before purchasing.
