

# Align-Pilates C Series Platform Extender

£58.00

## Product Images

## Short Description

Make your Pilates reformer even more versatile with the addition of a C-Series platform extender. This works with the mat converter (SKU - PAPMATC1MC) to create a single long bed of 2m+ on which you can perform mat work without the carriage moving underneath you. It is finished with the same tear-resistant covering and EVA padding so it creates a 'seamless' surface.

## Why Add Accessories to a Reformer?

The accessories available for the C1 and C2 series include this 'platform extender' which requires the '[mat convertor](#)' to create a single flowing mat on your reformer. This allows you to perform sitting exercises the same as you would on the floor, only it opens up the exercises to those with back problems and that find getting up from the floor difficult.

## C\* Series Platform Extender for Reformer

Extending the reformer bed to allow you to perform mat work is what this great attachment will do. This accessory, along with others like the mat convertor, actually ensures your reformer becomes even more versatile and better value for money.

Being able to perform mat work without having to get down on the floor actually enables lots of users with arthritis or postural issues to then be able to work on strength work for their core.

# Accessorize Your Reformer

This platform extender fits in neatly by the footbar and along with the mat converter creates one long mat on your reformer. This is a marine ply board with the EVA padding and anti-tear cover so it matches the rest of your reformer. Easy to slip into place - it's well worth the small additional cost.

## Additional Information
