£289.00

Product Images

Short Description

A premium quality Olympic barbell the Primal Strength ceramic coated "It's Heavy" dual 8 needle Olympic bar is available in a range of colours. Ideal for any gym or strength and conditioning centre, the bar weighs 20kg and is machine tested to 1000kg/190,000 PSI. Manufactured from steel with a military grade ceramic coating, this bar is designed to be chip proof and cope with heavy lifting.

Ceramic Olympic Bar

Primal Strength have manufactured this Olympic bar with 8 needle bearings and a brass centre bearing to ensure the smoothest of operations. Ceramic coated, the "Its Heavy" Olympic bar also comes with a 3-year no bend warranty. With dual knurl markings at 1.2mm and slightly knurled sleeves to help grip the plates, this is a serious lifting bar available in a range of colours that will stand out in your gym.

Description

Ceramic Coated Heavy Lifting Bar

The Primal Strength ceramic coated bars stand out. As one of the best Olympic bars you can buy in the UK

they have been designed specifically for heavy duty usage.

Using the same damage-proof technology as military grade weapons, this ensures the "Its heavy" ceramic bars are durable and will not chip/flake over time. The ceramic coating comes in a matte finish and the bars can be used in any weight lifting or crossfit facility.

What's "In" The Olympic Bar?

The 8 needle bearings ensure a smooth, reduced-friction spin during use so they are suitable for all power lifting exercises. What makes the Primal Strength "It's Heavy" bars so special are the range of colour options and the fact that they are tested to 190,000lbs per square inch level and machine tested under stresses of up to 1000kg.

The ceramic coating will also not chip or flake meaning they will last a lifetime (unless continually used with metal or poor quality J-hooks/spotters).

Why Choose The "It's Heavy" Range?

This range have a normal flex/whip and will always spring back perfectly. They also feature no centre knurling but use dual knurling for Olympic and Power lifting. The end sleeves are phosphorised with laser etched engraving and have light knurling to help grip your plates.

It is suitable for use with all 50mm Olympic or Bumper Plates. We recommend using high quality bumper plates with this bar for longevity.

With a 1-year no chipping warranty and 3-year no bend warranty, this bar takes some beating!

**3 year no-bend warranty is only valid if the bar has not been damaged due to negligent use, poor storage or handling. Negligent use includes but is not limited to; dropping the bar on a bench, non-rubberised j-hooks or spotter arms or excessive dropping with poor quality Olympic/bumper plates.*
