## Short Description

---

With a redesign and some new features, the fifth generation of the C2 Pro gets even better. There's a new "rapid change" spring bar that you can do with one hand as well as little things like the gondola pole hooks just under the frame. With it's leading carriage travel at 106.5cm, this is a superb reformer for homes and studios alike.

## The C2 Pro RC Reformer

With a couple of variants (wood fx and then alternative height models) you can set up your C2 Pro RC reformer the way you want it for your clients or just for you. It retains the high quality springs and very smooth travel of the carriage, plus with the vertical storage position it also doesn't need to dominate your space if you have other plans.

## The Align Pilates RC Pilates Reformer

The RC is the latest model upgrade for the very popular and successful C2-Pro reformer. With some upgraded components, changes to design and new fatures, it can only make this is a better buy for either home gyms or studios alike.

It's also very important to point out that the new RC C2 Pro still has compatibility with the earlier C Series accessories. This includes the mattress insert; standing platform; leg extensions; and half and full Cadillac frames.

## What's New?

- The rapid-change RC spring bar - possible with one hand

- Headrest design improved
- Maple pole holder just under the side
- Shoulder rests are now off-centre to allow for a choice of gap
- Better wheels for manoeuvring

## Key Features
