

3m Suspension Training Frame (6 Users)

£1,395.00

Product Images

Short Description

A great way to get into suspension training. Why not create a dedicated suspension training zone within your facility, or if your home is big enough grab one of these for your home gym.

The 3m TRX A-Frame is a commercial-grade oval steel tubing frame, finished with a silver powder coated finish. It is extremely durable and comes with a lifetime warranty on the main framework. We recommend these frames are bolted down for added stability but we do also have heavy skid plates available if bolting is not feasible.

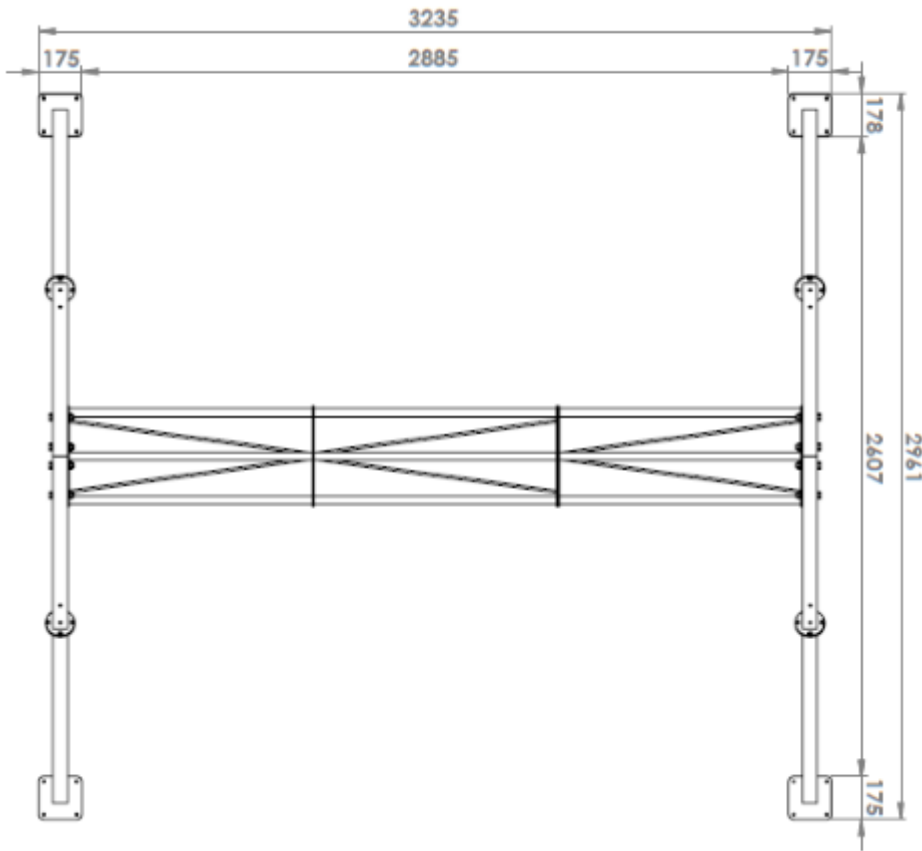

*Please note these frames are made to order and can have a 3-4 week lead time.

3m A-Frame for Suspension Trainers

Whether you use a TRX, Jungle Gym or any other suspension trainer, having a solid and stable A-Frame is vital for maximising the exercises you can complete. This 3m TRX Frame provides a great base unit for up to 6 people at the same time. It's manufactured out of oval steel tubing and comes with a silver powdered coating that protects from scuffs and scratches.

With an overall 3.2m width, this A-Frame has feet with a 17.5cm square plate to help keep the frame stable when in use. Coupled with its weight and design, this A-Frame will not let you down.
