

# Primal Strength Pro Series HIIT Air Bike

£999.00

## Product Images

## Short Description

Seen in gyms and CrossFit studios across the UK, air bikes are an essential piece of cardio. This Primal Strength Pro Series HIIT Air Bike is their latest offering that not only ensures you get a truly serious workout, but the low impact nature of working the upper and lower body means it's accessible for all.

## Choosing Your HIIT Bike

This air bike is a commercial grade bike, meaning it can be used as often as you wish and the warranty stands. With its oversized saddle for comfort, the 'sure grip' handlebars and the easy to use pedals, you have a sure footing from which to train as hard as you wish.

Built to a high standard, the Primal Pro Series Air Bike has a heavy duty frame, single-stage drive belt and of course adjustable seat and handlebar positions so you can get some comfort when it's all out!

The console provides the metrics you want - choose from time, distance and calories and select the type of units and screen display to suit your needs at the time.

Ultimately HIIT training is all about the short sharp workouts giving it maximum attack and high intensity to increase your heart rate and muscle work rate. HIIT air bikes are perfect for fitness, calorie loss and, as part of an overall workout, to raise your heart rate.
