

# Woodway CURVE (LTG) Treadmill

£0.00

## Product Images

## Short Description

---

The 'lightweight' version of the full Woodway Curve. This is a superb option for personal trainers, home gyms or smaller commercial studios. With its slatted belt that offers a cushioned run, the self powered curved LTG treadmill has much to offer including its new LCD console with all the usual suspects for metrics.

Whether you're looking for a HIIT workout, some serious sprint training (how fast can you really go) or just a longer run that will be a lot less painful than a road run, the Woodway LTG Curve comes with the reassurance of a solid warranty as well as the reduced need for any type of maintenance due to there being no motorised parts.

## Choosing A Curved Treadmill

The choice to switch to a curved treadmill over a traditional flat, motorised treadmill is one that is gathering pace (sorry for the pun). Since you power this treadmill yourself, it's eco friendly for starters. The curved deck itself promotes a more natural and efficient running style as runners tend to land on the midfoot or forefoot (as opposed to their heel). This running style also means you are [working harder and burning more calories](#) - specifically because you are the power.

The other beauty of the curved running surface is the fact you can control the pace. So not only can you start to "feel a pace", if it's too slow or too fast you can quickly and easily speed up or slow down - just move yourself forwards up the curve and you will get faster - move back slightly and the pace will slow. Finally, you'll love the durability of this Woodway Treadmill. Designed to last - there's no motor, and so many less parts to go wrong.

## Key Features

- Lightweight Self Powered Treadmill
- Unlimited speed
- Ergonomic design
- 3% Curvature running surface
- Grippy running surface
- Patented slat-belt proven to reduce shock
- Very quiet during use
- New LCD Display

# Less Injuries?

Put quite simply, the proof is in the studies and research behind the Woodway Curve LTG :

## ELIMINATES HARMFUL SHOCK

### POINT OF IMPACT

Only the Woodway running surface actually absorbs energy at the point of impact, eliminating harmful shock to joints and connective tissues.

## ABSORB ENERGY AT IMPACT

### LESS KNEE STRESS

Conventional treadmills are not designed to absorb energy at the point of impact, thus stressing the joints and connective tissues.

## Additional Information

SKU	WC-LTG
Weight	135.000000
Equipment Usage	Home & Light Commercial Use
Max User Weight	160kg
Power Consumption	None - self-powered
Speed Settings	Unlimited
Deck Type	60 Thermoplastic Slats
Deck Cushioning	TPE covered individual slats
Running Area	1600mm x 420mm
Incline	Natural Curve - max 3%
Drivetrain	Self-powered
Length Dimensions	1920mm
Width Dimensions	850mm
Height Dimensions	1780mm
